DELAWARE DIVISION
PSC DOCKET NO. 07-186

AREA EXTENSION PROGRAM

For residential facilities that are to be extended to one discrete geographic area and require a CIAC, the Company may establish one Area Extension Program ("AEP") on an experimental basis to recover these costs plus interest at a rate equal to the Company's cost of capital. The AEP amount will be billed to customers served by the extension providing that the CIAC can reasonably be expected to be collected over an amortization period not to exceed ten years.

1. The AEP, which shall be stated on a per Ccf basis, shall apply with respect to all natural gas sold or transported to Company customers located within the applicable discrete geographic area during the amortization period.
2. The AEP rate will be calculated by dividing (1) the amount of additional revenue required in excess of the Company's applicable tariff rates, including any taxes calculated on gross revenue, by (2) the volume of gas reasonably forecast to be sold or transported to customers within the applicable discrete geographic area during the amortization period. The additional revenue required is the amount determined necessary to recover the excess cost of the facilities, including the Company's allowed cost of capital as determined in accordance with the Company's internal rate of return model on file with the Public Service Commission.
3. AEP amounts collected shall be used specifically to amortize the cost of the project facilities within the applicable discrete geographic area requiring a CIAC. If the AEP collected is sufficient before the expiration of the amortization period to fully amortize the excess costs, including the provision for the accumulated cost of capital, the AEP for said discrete geographic area shall terminate immediately, and the Company shall promptly credit the affected customers for amounts over collected, if any. The Company will absorb any under recovery in existence at the end of the amortization period.
4. The Company shall have the right to reassess the amount of revenue available to recover the unamortized excess cost of the facilities on an ongoing basis and recalculate the AEP rate as needed, provided however, to the extent that any change in the AEP rate is required, the Company shall only have the right to change the rate once during the amortization period, subject to the maximum rate limitations set forth above.
5. The initial AEP rate computation and any further change to the established

AREA EXTENSION PROGRAM

rate will be submitted to the Public Service Commission for review and approval prior to the effective date of the surcharge. The AEP rate will then appear on Rate Schedule "AEP" in the Company's tariff. The Experimental Area Extension Program will be evaluated by the Commission at the expiration of 18 months after the filing of the one trial AEP application.
